INTRODUCTION

BEETAMAX is a professionally managed company having management team possessing years of experience in Contracting by successfully delivering projects to clients in Middle East. We are excellence providing diversified construction services for housing & infrastructure development, industrial construction, maintenance and turnkey solutions along with value added supply of industrial

A comprehensive project management system and detailed control procedures are being followed in BEETAMAX. This system covers all aspects of the business starting from the bid preparation, budgeting, planning, project execution, cost control, financial reporting, forecasting, feedback and control.

We have capability to carry out almost all trades of construction, interiors, Joinery & MEP under one umbrella. Thereby giving our customers edge of single point hassle free solutions and advantage over other fit out companies.

We collaborate with and work alongside architects, interior designers and nominated suppliers to professionally deliver high quality end-to-end fit out and refurbishment projects.

PHILOSOPHY

OUR MISSION

Our mission is to provide superior quality general engineering construction services that are contracted, scheduled, engineered, and managed to create maximum value for our customers, owners, employees, and the community.

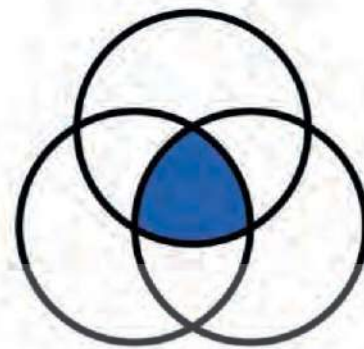

We strive to continually enhance the prestige and credibility of BEETAMAX as a construction & electro mechanical business, through highest levels of governance, ethical trading practices, assured systems of Quality, Economy and Timely performance.

OUR VISION

To be the leading contracting and Electro Mechanical company in the region by providing unparalleled quality services and consistently delivering effective, sustainable, innovative solutions to our valued clients.

OUR SERVICES

Turnkey Contracting

BEETAMAX provides experienced and knowledgeable professionals to handle all phases of project construction. As a General Contractor, we handle all types and volumes of projects from new construction to renovations. Our project management team provides full coordination throughout all project phases with our field staff, Workers and qualified subcontractors delivering project on schedule with the highest standards of safety, environmental and quality.

Beetamax focuses on providing its customers with the best possible services in its core competency. We engage in a variety of construction services to provide fit out from shell and core, All category fit -out, strip-outs and refurbishments working with the very fabric of the building - partitioning systems, structural modifications, MEP services, Fire Fighting and Fire Alarm System, providing bespoke joinery and metalwork, equipment and furniture. A project program is created to manage trades and undertake all aspects of the projects.

QUALITY, HEALTH, SAFETY AND ENVIRONMENT

HSE Policy

The construction safety practice has been framed to regulate the working conditions of any labour under Beetamax Contracting L.L.C who is involved in construction activities. Our company shall protect the place of work for each of our employees engaged in construction work at all our sites.

Health, Safety and Environment Protection Policy

Our Vision:

Beetamax Contracting L.L.C will control its projects to world class standards of safety and will be recognized for completing projects without causing harm to people or the environment.

Our Belief:

- Implementation of Health, Safety and Environment Regulations to provide a safest possible working environment to our employees, visitors and general public.
- Play a vital role for Health & Safety of our employees, visitors and general public.
- Instituting a Zero tolerance culture among employees.
- It is a good business practice to guard against accidents and occupational disease.
- All accidents, which injure people, damage machinery and destroy materials, can be prevented by taking specific safety precautions.

Our Path:

- Organization have set periodic objectives to ensure continual improvement.
- Strong, fair and effective enforcement of all approved Health, Safety and Environment regulations.
- Health & Safety performance of all the workmen shall be periodically monitored.

Beetamax Contracting Control's Policy Statement on Enforcement of Regulations

A. The purpose and method of enforcement:

The ultimate purpose of Beetamax contracting is to ensure that duty holders manage and control risks effectively, thus preventing harm.

1. The purpose of enforcement is to:
 - a. Ensure that duty holders take action to deal immediately with risks.
 - b. Promote and achieve sustained compliance with their regulations
2. Beetamax Contracting has a range of tools at their disposal in seeking to secure compliance with the regulations. Inspectors may offer duty holders information and advice, both face to face and in writing. This may include warning a duty holder that in the opinion of the inspector, they are failing to comply with the regulations. Where appropriated, inspectors may also serve improvement and prohibition notices, withdraw approvals, issue formal cautions.

QUALITY, HEALTH, SAFETY AND ENVIRONMENT

3. Giving information and advice, issuing improvement or prohibition notices are the main means which inspectors use to achieve the broad aim of dealing with serious risks, securing compliance with health and safety regulations and preventing accidents. A prohibition notices stops work in order to prevent serious personal injury. Information on improvement and prohibition notices shall be made publicly available.

4. Every improvement notice contains a statement that in the opinion of an inspector an offence has been committed.

5. Investigating the circumstances encountered during inspection or following incidents or complaints is essential before taking any enforcement action.

B. The Principles for enforcement of regulations

Beetamax Contracting believes in strong, fair and effective enforcement of health, safety and environmental regulations. It will follow the following principles:

Proportionally:

1. Proportionality which relating enforcement action to the risks.

2. In practice, applying the principle of proportionality means that Beetamax Management shall take particular account of how far the duty holder has fallen short of what the regulations require and the extent of the risks to people arising from the breach.

3. Where duty holders must control risks so far as is reasonably practicable, Beetamax Management consider protective measures taken by duty holders, shall take account of the degree of risk on the one hand, and on the other the measures necessary to avert the risk. Unless it can be shown that there is gross disproportion between these factors and what the risk is insignificant in relation to the cost, the duty holder must take measures and incur costs to reduce the risk.

4. Beetamax Management will expect relevant good practice to be followed. Where relevant good practice in particular cases is not clearly established, health and safety regulations effectively requires duty holders to establish explicitly the significance of the risks to the determine what action needs to be taken.

5. Some irreducible risks may be so serious that they cannot be permitted irrespective of the consequences.

Consistency:

1. Consistency of approach does not mean uniformity. It means taking a similar approach in similar circumstances to achieve similar ends.

2. Duty holder managing similar risks expect a consistent approach from Beetamax Management in the advice tendered the use of enforcement notices, approvals and in the response to incident.

3. Beetamax recognizes that in practice consistency is not a simple matter. Inspector face with many variables including the degree of risk, the attitude and competence of

QUALITY, HEALTH, SAFETY AND ENVIRONMENT

of management, any history of incidents or breaches involving the duty holders, previous enforcement action, and the seriousness of any breach, which include any potential of actual harm arising from a breach of regulations. Decisions on enforcement action are discretionary by the enforcer.

4. Beetamax Contracting Shall have arrangement in place to promote consistency in the exercise of discretion, including effective arrangements for liaison with other enforcing authorities.

Transparency:

1. Transparency means helping duty to understand what is expected of them and what they should expect from Beetamax Management. It also means making clear to duty holders not only what they have to do but, where this is relevant, what they don't. That means distinguishing between statutory requirement and advice or guidance about what is desirable but not compulsory.

2. When inspectors offer duty holders information, or advice, face or in writing, including any warning, inspectors will tell the duty holder to what to do to comply with regulations, and explain why. Inspector will, if asked, write to confirm any advice.

3. In the case of improvement notices the inspector will discuss the notice and if possible, resolve points of difference before serving it. The notice will say what needs to be done, why, by when, and that in the inspector's opinion a breach of the regulations has been committed.

4. In the case of a prohibition notice the notice will explain why the prohibition is necessary.

QUALITY, HEALTH, SAFETY AND ENVIRONMENT

Quality Management Policy

Project Quality Policy

- The strategic planning of project quality in our company requires the development of a policy that could state high-level goals and general direction of the project quality management process. A project quality policy is our effective tool of quality management to identify the correct methodology for an organization in order to implement a project following expected quality levels and performance. In our company we determine suitable approaches for implementing this policy.
- To establish, maintain and continual improvement in the Quality Management System based on the requirements of ISO 9001:2000.
- In our company Project Quality Policy is a statement of a high-level strategic governance model for identifying project quality goals and constituting the general direction of the quality management process.
- It is a strategic vision of our organization regarding formal expectations and requirements of project quality being achieved during the process implementation. The project quality policy statement gives a common description of all low-level tactical elements of the governance model, such as standards, plans, guidelines, approaches, activities and procedures.
- At Beetamax Contracting LLC, the development of the project quality policy document is the primary process within project quality planning and management, that is undertaken at the Project Planning Phase when subsidiary plans for managing a project are to be designed and approved.
- The quality policy statement is a foundation for developing a project quality management plan which is a sequence of tasks and activities aimed at placing the policy in practice and producing operational results.
- When we work on the development of the quality policy template for a project, account direction has been taken and expectations of the senior management regarding desired quality of project products and processes have been met. Also, we have considered several approaches to the implementation of our policy

Quality Policy Statement

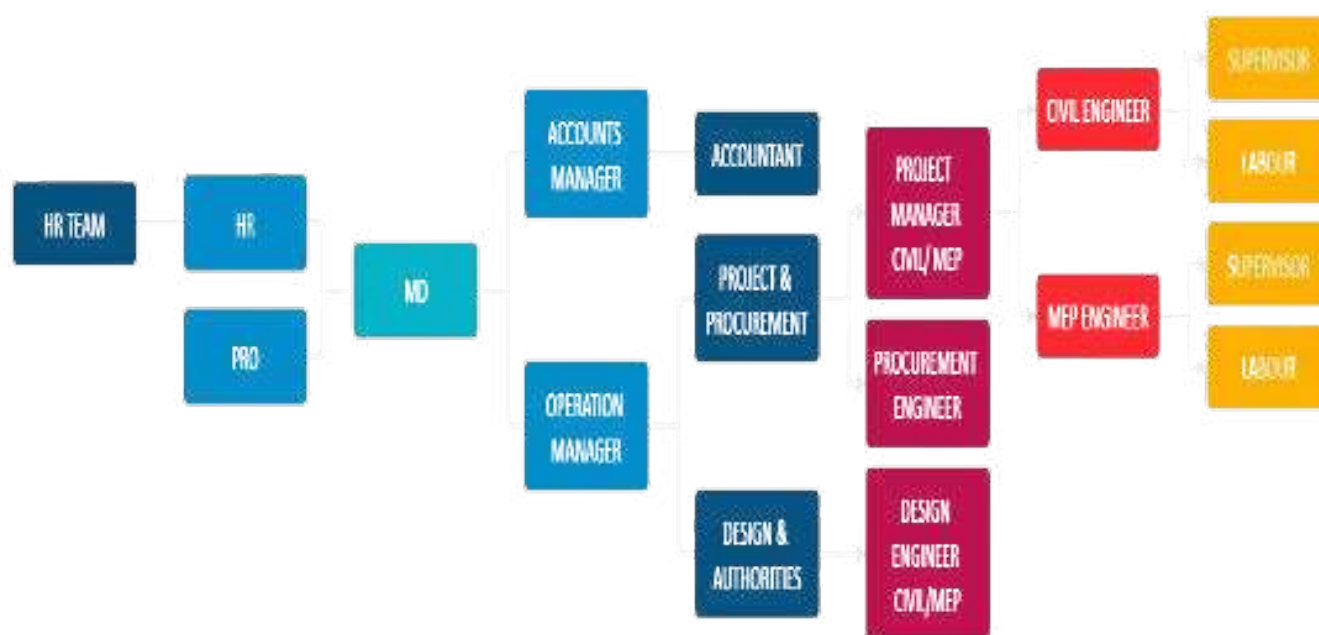

- Committed to supplying construction services of consistent quality that conform fully with company and statutory requirements and in meeting with our client's documented and implied expectations in terms of technical, budget and time compliance.
- The development and improvement of the company's construction services in line with client's needs and expectations.

QUALITY, HEALTH, SAFETY AND ENVIRONMENT

- The development of an efficient quality system and accepted practices in the management of construction projects, a system which not only ensures that the construction quality is consistent, but also helps to ensure minimal wastage in all our construction phases. The evaluation, training and development of our employees in order to meet the company's objectives.
- The ongoing development of the corporate culture that incorporates constant problem solving and continuous improvement, encouraging all employees to take total pride in, and responsibility for, their work and the development of better working practices.
- Establishing and reviewing quality objectives for all levels that are realistic, achievable and measurable taking into cognizance preventive action for outside influences that could prevent the achievement of the objectives. Management usually communicate this policy to all employees and staff in a way that it is properly understood.
